

The Economic Policy Research Network (EPRN Rwanda) is a membership-based non-governmental organization which brings together individuals and organizations active in economic policy research and analysis to support the provision of evidence for economic policy formulation and research development. EPRN Rwanda responds to gaps in economic policy research, especially due to a limited number of highly qualified and experienced researchers.

EPRN endeavors to strengthen the capacities of individual researchers, professionals, public and private institutions and civil society organizations through structured trainings with an aim of enhancing their capacities. EPRN aims to produce a professional pool of experts equipped with state-of-the-art knowledge and skills to ensure sustainable individual and institutional performance.

EPRN offers quality training services at affordable prices compared to what is obtainable in Rwanda and region.

Below is a Training Calendar for 2019.
